HOD Emergency (DNB/MD)

Description

In the ER doctor role, you will be leading the team responsible to ensure that incoming patients are stabilized, with no immediate dangers caused by their current conditions. You will perform various tests and follow-ups so that each treatment is effective. Success in this role will be demonstrated by your ability to solve patient cases and discharge patients without any issues.

Responsibilities

- Performs triage on incoming patients to become part of the ER's current load
- Oversees patient care, treatment, and recovery
- Participates in research efforts and clinical studies
- Manage duty doctor roster
- Maintains clinical records in line with regulations and standards
- Clears patients for discharge or further procedures with specialists
- Conducts follow-up to monitor patient's condition

Qualifications

- Medical degree from an accredited medical institution or program
- License to practice medicine (registration)
- Deep knowledge of current medical practices, procedures, and equipment
- Excellent written and oral communication skills
- Ability to work and think quickly in a high-stress environment
