## Resident Medical Officer (RMO) for Critical Care and High Dependency Unit (HDU) in a Multi-Specialty Hospital

**Hiring organization**  
Mediversal Hospital

**Date posted**  
June 23, 2023

### Description

The Resident Medical Officer (RMO) for Critical Care and High Dependency Unit (HDU) is a vital role in a multi-specialty hospital setting. The RMO is responsible for providing medical care and managing patients in the critical care and HDU areas. They work closely with a team of healthcare professionals to ensure the highest quality of care for patients requiring intensive monitoring and treatment.

### Responsibilities

#### 1. Patient Care:

- Assess and manage critically ill patients in the critical care and HDU areas.
- Perform initial evaluations, monitor vital signs, and provide appropriate medical interventions.
- Administer medications, fluids, and treatments as prescribed.
- Coordinate and collaborate with specialists, nurses, and other healthcare professionals to develop and implement patient care plans.
- Perform procedures such as central line insertions, arterial line insertions, and endotracheal intubations when necessary.
- Monitor patient progress, interpret diagnostic tests, and adjust treatment plans accordingly.
- Respond promptly to emergencies and provide resuscitation and life-saving interventions as required.

#### 2. Documentation and Communication:

- Maintain accurate and up-to-date medical records of patients.
- Document all assessments, interventions, and treatment plans in a timely manner.
- Communicate effectively with the healthcare team regarding patient progress, changes in condition, and treatment updates.
- Provide clear and concise instructions to nursing staff and other team members regarding patient care and management.

#### 3. Team Collaboration:

- Collaborate with consultants, specialists, and other healthcare professionals to ensure comprehensive patient care.
- Participate in multidisciplinary rounds, case discussions, and treatment planning meetings.
- Assist in the coordination of patient transfers and handovers to other departments or units.

#### 4. Quality Improvement and Education:

- Stay updated with the latest advancements in critical care and HDU practices through continued medical education.
- Participate in quality improvement initiatives, clinical audits, and research activities.
- Provide guidance and education to junior medical staff, nursing personnel, and other healthcare professionals.
- Contribute to the development and implementation of protocols and guidelines for critical care and HDU management.

## **Qualifications**

- Medical degree (MBBS or equivalent) from a recognized institution.
- Valid medical license or registration to practice.
- Prior experience in critical care or HDU is highly desirable.
- Strong clinical skills and the ability to make quick and accurate decisions in emergency situations.
- Excellent communication and interpersonal skills to effectively interact with patients, families, and the healthcare team.
- Ability to work well under pressure and in a fast-paced environment.
- Willingness to work in rotational shifts, including nights, weekends, and holidays.
- Commitment to continuous learning and professional development.

## **Job Benefits**

- Competitive Compensation
- Professional Development Opportunities
- Exposure to Multidisciplinary Care
- Skill Enhancement
- Career Advancement Opportunities
- Personal Satisfaction
- Exposure to Diverse Cases
- Continuous Learning Environment
- Job Stability
